In re: 700 MHz Interoperable Broadband Public Safety Broadband Network PS Docket 06-229

Dear Ms. Dortch:

On December 3, 2009, Roger Quayle, Chief Technology and Co-Founder of IPWireless, Andy Smith, Vice President of IPWireless, and I, the undersigned, visited with Nick Sinai, Energy and Environmental Director for the National Broadband Task Force of the OSP related to efforts to development and implementation of an interoperable broadband network for public safety.

The focus of this meeting was related to the potential synergy that could be realized from expansion of the current proposals for a dedicated public safety broadband network to one that included elements of the critical infrastructure community. Issues related to definitions of public safety within the current FCC regulatory structure were paramount within this discussion.

Respectfully Submitted,

Joe Hanna, President
